

CORPORATE FACT SHEET

Company Overview	Headquartered in Silicon Valley, Trovix Inc. was founded in 2002 with the goal of providing products and services that would bridge the gulf between employers and people in search of the best career opportunities. To do this, Trovix has developed search technology that uses artificial intelligence and fuzzy logic to understand job descriptions and resumes in the same way a human does. Its first product, Trovix Recruit™, helps employers find and hire candidates, while its latest service, Trovix, helps consumers stay aware of the best job opportunities for them.
Technology	Trovix's technology is based on more than 10 years of research and 8 search related patents. At the core is the ability to read job descriptions and resumes, and understand the content of these documents in a way that is useful. For example, Trovix can apply more weight to important attributes of a job, or recent skills used by an applicant.
Enterprise	Trovix Recruit, launched in 2005, combines the Trovix search technology with a full-featured applicant tracking system. Trovix Recruit helps recruiters by identifying the best candidates and then speeding them through the recruiting process. The applicant tracking features include collaborative workflow, streamlined communications, scheduling and custom reporting. In 2006, Trovix Recruit was awarded "Top HR Product of Year" by <i>Human Resource Executive Magazine</i> .
Consumers	Launched in 2007, Trovix's consumer service uses Trovix's search technology as a foundation to provide a free, confidential and effortless way for working professionals to stay aware of ideal career opportunities. Trovix ensures that people have access to the very best jobs based on their work experience and goals, not just keywords. The service combs through millions of current openings to find and present the most relevant career matches.
Customers	Trovix users include successful organizations such as Palm, Stanford University, Hallmark, Linksys, Extreme Networks, Salesforce.com, VMware, and Rambus.
Investors	Trovix is backed by top-tier venture capital firms including 3i, Granite Ventures and USVP.
Funding	Series A (\$5.25M) and Series B (\$18M)
